

EasyStern® CWS Propell

Blokland Non Ferro bv

Blokland Non Ferro is a Dutch family business, founded in 1962 and active on the global marine market. The company specializes in designen, producing and supplying complete propulsion- and rudder systems for yachts and small commercial vessels as well as box coolers and heat exchangers for inland- and commercial vessels and industrial applications.

With extended possibilities for design and production of our products we offer you an attractive combination of superior know-how, experience and production possibilities.

We offer two kind of propulsion systems:

- › Fixed pitch propeller system
- › Retractable propeller system

With numerous national and international references Blokland Non Ferro has built a reputation of a highly

dependable quality player. We provide shipyard and naval architects around the world with our solutions. For (small) yachts as well as megayachts (both motor- and sailing yachts). Blokland Non Ferro also produces technical propulsion components and holds a comprehensive stock so that customers can be serviced promptly.

Blokland Non Ferro offers you the following services:

- › Standard and custom designed propulsion- and rudder systems
- › Design and supply of box coolers and heat exchangers
- › Sales and distribution of technical marine equipment

Blokland Non Ferro is committed to offer quality solutions and products only. Comfort and noise reduction are basic elements in our process of engineering.

Blokland Non Ferro operates worldwide from its premises in Sliedrecht, The Netherlands.
